

Agricultural Classification Notification

Account # / Parcel ID _____

The granting of the Agricultural Classification by the Office of the Property Appraiser is based upon the requirements of Section 193.461, F.S. and must continue to meet the requirements on an annual basis. A full copy of the statute is available at www.MyFlorida.com

Once an Agricultural Classification is obtained, it is the responsibility of the owner to continue to utilize and maintain the property in a bona-fide commercial agricultural operation. It is incumbent upon the owner to promptly advise the Office of the Property Appraiser of any change in the agricultural use, change of lease, reduction or increase in the acres being utilized, etc. Failure to notify the Property Appraiser of changes in use may result in removal of classification.

As part of the application and upon request of the Office of the Property Appraiser in subsequent years, applicants may be required to provide documentation of the agricultural business, including, but not limited to: schedule "F" or "C" from their federal tax return, required state and local business licenses, state tax certificate and or business registration, receipts for the buying and selling of animals, veterinary bills and supplies, liability insurance policies, feed, seed, fertilizer, fencing, irrigation equipment, bedding material, and leases.

The approval process for each application is unique and documentation requirements may vary. Property inspections will be conducted from time to time and the applicant will be responsible for assuring access to the property.
